Notice of Hearing on Proposed Administrative Regulations

A public hearing will be conducted at the KDHE open meeting, 9 a.m. Tuesday, August 23, in the auditorium of the Kansas Historical Society, 120 W. 10th, Topeka, to consider the proposed changes in existing radiation rules and regulations. These regulations are proposed for adoption on a permanent basis. A summary of proposed regulations and the economic impact follows:

Proposed amendments to K.A.R. 28-35-135, 28-35-199a, 28-35-211a, 28-35-212a, 28-35-212b, 28-35-213a, 28-35-214a, 28-35-217a, 28-35-219a, 28-35-220a, 28-35-221a, 28-35-221b, 28-35-222a, 28-35-223a, 28-35-224a, 28-35-225a, 28-35-226a, 28-35-228a, 28-35-230a, 28-35-230b, 28-35-231b, 28-35-333, 28-35-334.

New regulations K.A.R. 28-35-144a, 28-35-211c, 28-35-211d, 28-35-212c, 28-35-212d, 28-35-212e, 28-35-212f, 28-35-212g, 28-35-213b, 28-35-214b, 28-35-217b, 28-35-227b, 28-35-227c, 28-35-227d, 28-35-227e, 28-35-227f, 28-35-227k, 28-35-227l, 28-35-227k, 28-35-227l, 28-35-230c, 28-35-230d, 28-35-230e, 28-35-230f.

Revocation of K.A.R. 28-35-215a, 28-35-227a, 28-35-233a and 28-35-234a.

These regulatory actions will implement the provisions of K.S.A. 48-1601 et seq. and the agreement between the United States Nuclear Regulatory Commission (USNRC) and the state of Kansas to provide for compatible regulation of radiation throughout the state.

General Background for Regulatory Changes

Revisions to the USNRC regulations in 10 CFR Part 20 were adopted in 1990 with the provision that all USNRC licensees would change their programs to reflect the changes by January 1, 1994. In order to offer a compatible program for those licensees who possess and use radioactive materials and radiation in both Kansas and areas where USNRC retains jurisdiction (e.g. the states of Oklahoma and Missouri) it is necessary to amend the regulations to reflect the new language, including K.A.R. 28-35-135, and those regulations where the new language is used. The amendment, in addition to developing new language, introduces new concepts in radiation control developed in the past 20 years. In general, these include the ability to sum the doses received by individuals from radiation originating outside the body of the individual and that received from radioactive materials deposited inside the body of the individual. The previous practice of permitting higher exposures based on the age of individuals has been found to be inappropriate and has been removed from the proposed regulations. The remaining changes are intended only to clarify these changes. Analysis by KDHE has indicated that the total cost of implementing these changes to the state will be very small. The scope of the regulated community and the manner of licensing and documenting compliance will not be changed nor will additional staff in radiation control programs be needed. Costs to the regulated community will primarily be those associated

with revising the recordkeeping system, which will be limited to those licensees or registrants where significant internal, deposition of radioactive materials combined with external exposure to radiation occurs. No new fees are included in this proposed amendment.

Description and Purpose of Specific Regulations

Amendments to K.A.R. 28-35-135. Definitions. Proposed revisions to K.A.R. 28-35-135 define and clarify a number of terms used in the new and revised regulations. Notable among these are definitions of effective dose equivalent and the terms needed to calculate this new dose evaluation concept. This includes definitions of annual limit on intake (ALI), derived air concentration (DAC), collective dose, committed dose equivalent, external dose, internal dose, quality factor, reference man, stochastic effect, weighting factor, and total effective dose equivalent. These concepts permit the combination of the internal and external exposure into a single dose. Additional definitions relating to the doses received by the public and embryo/fetus are included to permit clarification of issues not previously acknowledged clearly in the regulations either nationally or in the state regulations. Recent legal and regulatory clarifications have made this possible and necessary.

Amendments to K.A.R. 28-35-199a. Schedule D. Proposed revisions to this regulation are to acknowledge the changes in the evaluation of specific radioactive materials as drugs by the United States Food and Drug Administration. It is no longer necessary or useful to list

each drug in this schedule.

Amendments to K.A.R. 211a. Radiation protection standards. Proposed revisions include the statements needed to remain compatible with USNRC and use the updated language and procedures included in the 10 CFR Part 20 revisions.

Amendments to K.A.R. 28-35-212a, 212b, 213a, 214a, 219a, 220a, 222a, 223a, 224a, 225a, 226a, 228a, 229a, 230a, 230b, 333, and 334. Proposed revisions to these regulations are needed to remain compatible with the language in the definitions related to the new methods of calculation of dose or to correct references to regulations changed because of the revision to include the new method.

Amendments to K.A.R. 28-35-221a, 221b and 231b. Proposed revisions to these regulations are needed because of the need to remain consistent with amendments to United States Department of Transportation rules related to the shipment of radioactive materials, and United States Environmental Protection Agency-United States Nuclear Regulatory Commission shipping manifest rules.

New regulations K.A.R. 28-35-144a, 211c, 211d, 212c, 212d, 212e, 212f, 212g, 213b, 214b, 217b, 227b, 227c, 227d, 227e, 227f, 227g, 227h, 227i, 227j, 227k, 227l, 230c, 230d, 230e, and 230f. Proposed new regulations set forth the values of the quality factors, the way these factors and the weighting factors will be used by the registrants and licensees, as well as the recordkeeping requirements created by the new procedures. These proposed new regulations also list the values for the ALI's and DAC's which must be used by all licensees and registrants to assure compatible radiation control and consistency with

the federal and state mandate to operate a compatible

Revoked regulations K.A.R. 28-35-215a, 227a, 232a, 233a, and 234a. Proposed revocation of these regulations is necessary because they contain the provisions for calculating the doses used before the new provisions were developed. They would be inappropriate and contain information which is no longer useful. In addition, since these were replaced by USNRC with very long tables of values which are used by the licensees and registrants to calculate doses or concentrations, they have been published as a separate department document with the changes necessary to include all radioactive materials users in Kansas. A copy of this document will be provided to each licensee.

These changes are mandated by the USNRC-Kansas Agreement and do not include requirements which would impact the Kansas radioactive materials licensee different from that which would exist if USNRC were to be the regulatory agency. The only exception would be that if the USNRC were to be regulating the Kansas licensees, the USNRC's fee system would constitute a much greater fiscal impact than the current state fee system. The average Kansas license costs \$360 every other year. The latest USNRC fee system includes an annual fee of \$400 to \$1,800 depending upon the licensee's status as a "small business" (gross annual receipts of less than \$250,000) in addition to a license and inspection fee, each of which is in the range of \$400 to \$1000 for the types of licensees in Kansas.

Copies of the regulations may be obtained from the Kansas Department of Health and Environment, Bureau of Air and Radiation, Building 283, Forbes Field, Topeka 66620-0001. Questions pertaining to these proposed rules should be directed to Gerald Allen at (913) 296-1562.

This 30-day notice of the public hearing shall constitute a public comment period for the purpose of receiving written public comments on the proposed rules and regulations. All interested parties may submit written comments prior to the hearing to Gerald Allen at the address above. All interested parties will be given a reasonable opportunity to present their views orally on the adoption of the proposed regulations during the hearing. In order to give all parties an opportunity to present their views, it may be necessary to request each participant to limit any oral presentation to five minutes.

Any individual with a disability may request accommodation in order to participate in the public hearing and may request the proposed regulations and fiscal impact statements in an accessible format. Requests for accommodation to participate in the hearing should be made at least five working days in advance of the hearing by contacting Sandy McAdam at (913) 296-6917.

If an answer is filed, the answer shall be filed with the designated hearing officer within 20 days after service of the complaint.

(b) If an answer is filed, the respondent's answer shall

(2) When the new evidence reveals additional charges should have been filed, a new complaint containing appropriate additional civil penalties may be filed.
